Education

Sharif University of Technology (SUT), Tehran, Iran

Bachelor of Science, Computer Science

2020 – Jun 2026

Allameh Tabatabaee High School (selective, non-governmental), Tehran, Iran

High School Diploma, Mathematics and Physics

2016 – 2020

Research Interests

- Distributed & Decentralized Systems
- IoT & Cyber-Physical Systems
- Multi-Agent Systems
- AI-Driven Network Automation

Publications

In Preparation

- A. Vaezi, S. Niknejad, **K. Siavashpour**, A. Dadras, “FAIR: A Novel Envy-Free Multi-Agent Model for Traffic Systems,” manuscript in preparation for the International Conference on Autonomous Agents and Multiagent Systems (AAMAS) 2027, abstract submitted
- A. Siavashpour, **K. Siavashpour**, M. Azadegan, B. Safaei, H. Peyvandi, M. Imran, “A Comprehensive Survey of Self-Organizing Networks in Next-Generation Cellular Systems,” manuscript in preparation for submission to the IEEE Open Journal of the Communications Society (OJ-COMS)
- A. Vaezi, A. Daneshgar, A. Dadras, **K. Siavashpour**, “The Loop of the Rings: A Fully Decentralized Reliable Cooperative System,” manuscript in preparation for submission to the IEEE Symposium on Foundations of Computer Science (FOCS) 2027, [\[arXiv\]](#)

Research Experience

Research Assistant, Institute for Research in Fundamental Sciences (IPM)

& **Sharif University of Technology**, Tehran, Iran

supervisor: [Dr. Arash Vaezi](#)

May 2026 – Present

project: “FAIR: A Novel Envy-Free Multi-Agent Model for Traffic Systems”

- Revised two of the paper’s lemmas after simulation on real road networks contradicted them.
- Built the evaluation simulator for 7 city road networks (9K–20K edges, 33K–132K trips each).
- Found congestion stays bounded under sustained demand, with gains on the worst-served trips.

Research Assistant, Institute for Research in Fundamental Sciences (IPM)

& **Sharif University of Technology**, Tehran, Iran

supervisors: [Dr. Arash Vaezi](#), [Dr. Amir Daneshgar](#)

Aug 2024 – Present

project: “The Loop of the Rings: A Fully Decentralized Reliable Cooperative System”

- Contributed to the paper’s worst-case analysis of LoR’s reliability and user satisfaction.
- Implemented the LoR core in Go: cooperation rings, fractal rings and verification teams.
- Ran 421 simulations of 500 traders each, sweeping the shares of random and malicious traders.
- Simulations supported the theoretical bound: reliable service with at least 60% honest traders.

Research Assistant, Sharif University of Technology, Tehran, Iran

Aug 2024 – Present

supervisors: [Dr. Hossein Peyvandi](#), [Dr. Masoumeh Azadegan](#) (Khatam University)

collaborators: [Dr. Bardia Safaei](#), [Dr. Muhammad Imran](#) (University of Glasgow)

project: “A Comprehensive Survey of Self-Organizing Networks in Next-Generation Cellular Systems”

- Wrote about half of the survey and reviewed about half of its 114 papers.
- Mapped each SON function to its control parameters, objectives and algorithm families.
- Traced trends across the 114 papers, showing a shift toward self-optimization and resilience.
- Identified open problems, including conflicts between SON functions and SON’s role in 6G.

Research Assistant, Politecnico di Milano, Milan, Italy (Remote)

supervisor: [Dr. Gianni Antichi](#)

May 2024 – Aug 2024

- Researched WebAssembly for systems acceleration and designed a benchmarking plan for CPU, memory, latency, and throughput.

Research Assistant, **Sharif University of Technology**, Tehran, Iran

supervisor: [Dr. Bardia Safaei](#)

Oct 2023 – Jan 2024

- Researched nature-inspired FANET and IoT cluster routing with mobility-aware benchmarking.
- Prototyped beaconing and neighbor discovery, and analyzed energy–delivery trade-offs.
- Built reproducible pipelines (configs, seeds, scripts) for experiment reruns.

Honors & Awards

Top 0.1% among 155,250 candidates, Iranian University Entrance Exam (B.Sc.)	2020
1 st place in National Hovercraft Competition (two consecutive years), design & control	2016 – 2017
1 st place in Provincial Chess Competition (High School)	2016
1 st place in Provincial Table Tennis Competition (High School)	2015

Selected Courses

- | | |
|--|-------------------------------|
| o Machine Learning Systems Design: 20/20 | o Image Processing: 19/20 |
| o Data and Network Security: 19.6/20 | o Numerical Analysis: 18.5/20 |
| o Stochastic Processes: 19.2/20 | |

Teaching Experience

Teaching Assistant, Sharif University of Technology

Computer Networks, Dr. Mahdi Dolati	Fall 2026, Winter 2026
Operating Systems, Dr. Hossein Asadi	Fall 2026
Operating Systems, Dr. Hossein Asadi & Dr. Rasul Jalili	Fall 2024
Computer Networks, Dr. Hossein Peyvandi	Winter 2024
Operating Systems, Dr. Arash Vaezi [Piazza]	Winter 2024
Computer Networks, Dr. Kambiz Mizanian	Fall 2023
Operating Systems, Dr. Mohaddeseh Mirbeygi & Dr. MohammadAli Mirzaei	Fall 2023

Designed and graded weekly assignments (120+ students in the largest classes), wrote rubrics, held office hours, guided projects and built autograders.

Notable Projects

SliceDB: Distributed Key-Value Store (<i>Go, etcd</i>) [GitHub Link]	2025 – 2026
- Built a sharded key-value store with write-ahead-log replication and leader election through etcd. - Added automatic failover and online resharding; killing a node under load caused 0 failed requests.	
Multimodal Product Search (<i>Python, CLIP, FAISS</i>) [GitHub Link]	2025 – 2026
- Built text and image search over 1M products, evaluated on 5,000 real user queries.	
Highly Available HDFS + Spark (<i>Hadoop, ZooKeeper, Spark; team of two</i>) [GitHub Link]	2025
- Deployed HDFS with automatic NameNode failover and ran Spark queries on NYC taxi data over it.	
Go Judge: Online Judge (<i>Go, PostgreSQL, Docker; team of two</i>) [GitHub Link]	2025
- Built the web server, UI and database schema of a judge that runs each submission in a Docker sandbox.	
Go Download Manager (<i>Go; team of two</i>) [GitHub Link]	2025
- Built a terminal downloader with parallel range requests, pause/resume and per-queue speed limits.	

Skills

Programming Languages:

Java, Python, C/C++, Go, JavaScript, Bash

Tools:

Git, Docker, L^AT_EX, NS-3, PostgreSQL, Spark

Frameworks & Libraries:

PyTorch, TensorFlow, scikit-learn, Matplotlib

Web Programming:

Vue, Flask, HTML5, CSS

Languages

Persian (Native)

English (C1)
